

Business Broadband

Avoid being stuck in the slow lane by connecting free to our fast, business only broadband, offering speeds up to 16Mb/s.

We offer a suite of broadband products specifically tailored for Business users. You can choose the broadband that meets your needs be it the "Lite" service for single user or home office applications right through to the "Express" service for the most demanding users.

Pre configured routers are available to support your broadband, choose from a single port router or a 4 port router with wireless capability. Pre configuring the router enables you to simply connect the router and gain immediate access to the service.

Our VideoConnect service is engineered to support video systems up to and including HD Video. It provides identical up and down speeds, no contention and performance assurances defining latency, jitter and packet loss. The VideoConnect service also comes with an enhanced support package that stipulates faults will be cleared within 24 hours, essential for business critical applications such as video.

Our Pricing Options

| Broadband | Downstream Upto ** | Upstream Upto ** | Equivalent Contention | Download Limit | Connection **** | Monthly Rental |

Service Fees

| | |
|-----------------------------|--------|
| Cancellation Fee | £35.00 |
| Regrade change service type | £50 |

New broadband connections

All new connections require an analogue phone line. Take advantage of our free installation service or migrate your existing lines to us to enjoy lower line rentals.

Existing broadband connections

Migrate your existing broadband service to us and your business can benefit from reduced rentals and improved connection rates. All we need is a MAC code from your existing supplier and we will do the rest.

| Router | Description | Sale Price | Rental |
