**Telecom IT Savings on your Current Telecoms**

Our analysis shows that minimum savings of **£559.18** per annum or **32.32 %** can be implemented within 22 days, by migrating you to Telecom IT and applying our NB3 tariff scheme rates.

The calculated savings have been derived from both your line rental charges, and profiled call charges.

The timescales are achievable due to the information you have already provided, which will allow the smooth implementation of Telecom IT Business services across your existing Service Provider lines via our Business Lines & Calls product.

**Current Services & Call Charges**

Telecom IT has investigated your billing information, which indicates the following annualised charges for TEST COMPANY LTD

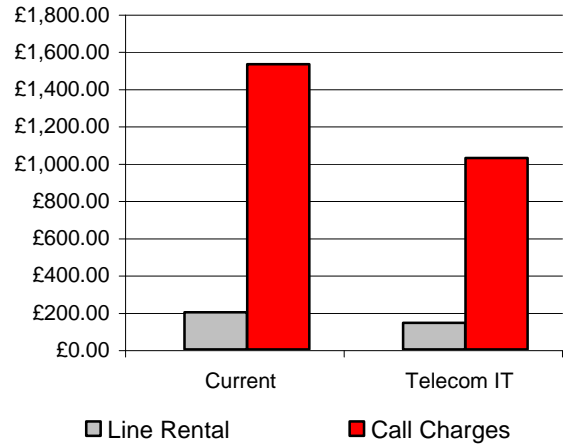

Annualised Charges	Current	Telecom IT	Savings
Line Rental	£200.00	£143.40	£56.60
Call Charges	£1,530.00	£1,027.42	£502.58
<b>Total</b>	<b>£1,730.00</b>	<b>£1,170.82</b>	<b>£559.18</b>

In order for Telecom IT to calculate your potential savings, a call profile has been derived from your current call costs on the received current supplier invoice(s).

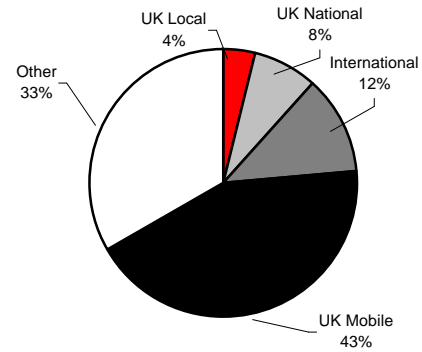

**Call Profile - Period: Monthly**

Destination Type	Current	Telecom IT	Savings
UK Local	£5.00	£4.88	£0.12
UK National	£10.00	£4.88	£5.12
International	£15.00	£15.00	£0.00
UK Mobile	£55.00	£30.36	£24.64
Other	£42.50	£30.50	£12.00
<b>Total Calls (net)</b>	<b>£127.50</b>	<b>£85.62</b>	<b>£41.88</b>

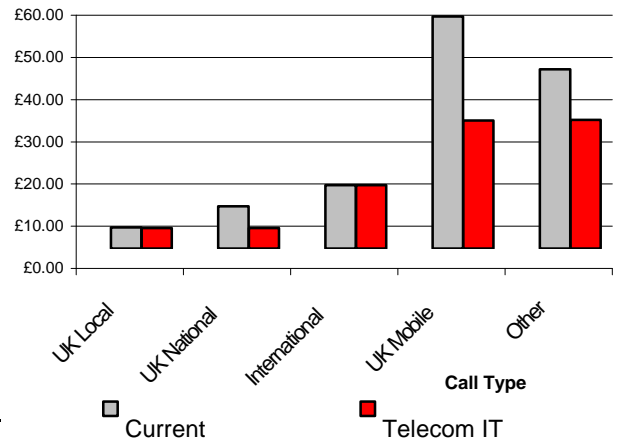

**Proposed Telecoms Savings (per annum)**

**Current Call Profile (%) by Call Type (per period)**

**Proposed Call Savings by Charge Type**

## Telecom **IT** Business Phone Lines & Calls

Only Pay for what you use

No call charges in advance

No confusing capped rates

Savings can be achieved on your Telephony, where you migrate these services from your current supplier to Telecom IT.

From our analysis of your current telecommunications estate, we have found that by migrating your existing

### Line Rentals

Service Provider Line Rentals of £200 per annum to the Telecom **IT** network, it is possible that an **Estimated Savings of £56.6 per annum** is achievable.

### Call Charges

Service Provider Call Profile of £1530 per annum over the Telecom **IT** network, it is possible that a **Further Estimated Savings of £502.58 per annum** is achievable.

By using Business Phone Lines & Calls from Telecom IT, we will become your sole business service provider for your line rental and business call charges.

This allows TEST COMPANY LTD to take advantage of having a single port of call for your critical business phone lines, as well as benefitting from our dedicated customer service, geared to working with your business.

## Putting Your Needs at the **HEART** of Our Business

## Communication Savings

## Seamless Implementation

## Audit Assumptions

### Telecom IT and Your Communications Review

The aim of this report is to demonstrate what TEST COMPANY LTD can save by transferring your line rentals to Telecom IT.

Our calculations are based on your current billing with your current supplier(s) and recalculated with our competitive business tariffs.

This can result in a reduction in your overall telecommunication budget or identify available revenue to finance upgrades to your current infrastructure.

Savings can be fulfilled by migrating your existing Service Provider Line Rentals and Call Charges through our **Business Lines & Calls** service.

The findings given are based on billing information, provided by your company, with regard to your existing Service Provider(s).

Several assumptions have been taken:

Calculations have been taken from either a monthly or quarterly bill and approximated to provide per annum costs

Calculations are based only on fully itemised information (calls and line rental charges). Savings on non-itemised elements have been excluded in order to provide a conservative indication of the savings available. However, in reality, additional savings may well be realised on any non-itemised charges.

The quality of the review is wholly dependant upon the quality and format of the information received, as well as the degree of itemisation

Please contact your Telecom IT Account Representative for further information on our **Business Communications Review**

## About Us

## Who are we?

## Why choose to work with us?

### Dedicated business service provider

We are an established communications company based in the Midlands, supporting over 2,500 customers and dealers throughout the United Kingdom and focussed on putting your needs at heart of our business.

#### Worldwide ISDN Ltd

Worldwide ISDN was established in 1999 and initially specialised in providing niche Network Services for Video Conferencing and Audio Conferencing users in the SME/Corporate market

#### Telecom IT Ltd

Telecom IT was established in 2002 providing more traditional Inbound and Outbound telephony services for SME's.

In 2006, the two companies merged and now offer a full portfolio of services to all of our customers, whilst maintaining the same commitment to customer service that each company had previously championed.

#### Why place your business with us?

We pride ourselves and placing our customer's requirements at the centre of everything we do.

In fact, we encourage our customers and partners to be vocal about what they want so we can put all our effort in delivering the right service time after time. Our mission is to ensure:

- We are easy to do business with
- You will get through to us first time, every time
- You can order your services through a single point of contact
- You can have all your outbound calls, broadband services, inbound 08 numbers and features with us on a single bill

- We can email your bill to you, reducing the need of paper
- We will not confront you with an automated menu of endless options
- We offer value for money in the services we offer

Call us on **0800 404 6677** and give us an opportunity to demonstrate how we can help your business today
